

**Product Discontinuance Notification—PDN# 0000370890**

**July 19, 2022**

Dear Valued Customer,

We would like to inform you that Moxa is going to discontinue the OnCell Central Manager(OCM) and OnCell Central Manager Browser (OCM Browser), which are free download software on the Moxa website. This process will effectively begin August 1, 2022, and the software will be not available from December 31, 2023.

On January 12, 2021, Adobe ended Flash support and blocked Flash content to those Flash-enabled applications, resulting in the abnormal operation of OCM software.

To sustain Moxa customers' daily system operation, MOXA provided the “OCM Browser” to support the OCM software, extending its life cycle for three years. The licenses of OCM Browser will expire December 31, 2023. The OCM service will also end on December 31, 2023.

Please review the details below to determine how these discontinuances will affect your products and/or operations.

**Which products will be discontinued?**

In this table, we list the discontinued and the recommended central management solution of each product. Please consider migrating your device to the latest model to support Moxa central management solution.
